

R1 placement (mean of 2)
R2 bracketing (mean of 3)
R3 turn (mean of 1)
control: another legal move (null)
one category inside a rule (within-rule spread)
in the 2-D PCA plane its fork panel draws
the same distance in that cell's full space (the plane holds only part of it)
the cell's own legal control, averaged over $r \geq 0$
95% CI of the mean over 1553 source games

within- ÷ between-rule spread of the displacements a rule mean averages: median 0.945 [IQR 0.872–1.020] (rule_groups)
R1 placement — a move puts one disc of the mover's color on an empty square.
R2 bracketing — the disc must close a gapless line of opponent discs with one of the mover's own.
R3 turn — colors alternate; legality is judged for the mover, not the opponent.
