
discs in absolute colour, black to move at t_0
outlined cell = a branch square, its marker in the corner so a disc underneath stays visible; dashed ring = a disc the played move flips

one move per branch, styled as in the fork figure.
7 moves are legal at t_0; the played move and two of the other 6 are branched.
One game (n=1): an illustration of the design, not a claim.

- reference (the game as played)
- R1 occupied (own)
- R1 occupied (opp)
- R2 detached
- R2 own-only
- R2 no bracket
- R3 opponent-only
- control: another legal move (null)
- control 2: a third legal move (null)

R1 placement — a move puts one disc of the mover's color on an empty square.
R2 bracketing — the disc must close a gapless line of opponent discs with one of the mover's own.
R3 turn — colors alternate; legality is judged for the mover, not the opponent.
