
mean over source branches, K=4 averaged; 95% bootstrap CIs in the CSV

- R2 detached (n=1951)
- R2 own-only (n=1630)
- R2 no bracket (n=1949)
- R3 opponent-only (n=1997)
- reference branch, its own move (n=2000)
- reference branch, same square (n=2000 games)
- control_legal branch, same square (coincides)

mean over source branches, K=4 averaged; 95% bootstrap CIs in the CSV

- occupied (own) (n=2000)
- occupied (own), reference branch
- occupied (opp) (n=2000)
- occupied (opp), reference branch

the sampled reference's board ends at its first illegal move: 1.1% of window positions have no board and are dropped, so n falls with r.

R1 placement — a move puts one disc of the mover's color on an empty square.
R2 bracketing — the disc must close a gapless line of opponent discs with one of the mover's own.
R3 turn — colors alternate; legality is judged for the mover, not the opponent.
