

point = one square; filled = centroid; open = committed probe.
No origin, and distance is monotone in angle, not proportional.
Rank fidelity ρ = 0.50 (null 0.57), scored without illegal, which is exactly −legal per square

rule / board split (82% bal. acc.)
legal (reference) (n=60)
illegal (n=60)
R1 (n=60)
R2 (n=60)
R3 (n=60)
board colour (n=64)
board position (n=60)
