
A.
rank
file — black to move
t_0-2, move 18
detector: legal, correct
file — white to move
t_0-1, move 19
detector: illegal, false alarm
R2
file — black to move
t_0, move 20
detector: illegal, correct
file — white to move
t_0+1, move 21
detector: legal, correct
file — black to move
t_0+2, move 22
detector: legal, correct
B.
peak at t_0
R1 placement
R2 bracketing
R3 turn
legal control (baseline)
τ = 0.618 (threshold)
standardized norm of step length
game move number t ($t_0=20$ is the spliced move)
C.
chance
95% CI
AUROC
0.681
0.595
0.757
0.662
legal / illegal
R1
R2
R3
D.
legal control (baseline)
illegal
R1 placement
R2 bracketing
R3 turn
τ = 0.618 (threshold)
number of games
S_t (standardized norm of step length)
